Linda K. Lillie of Sprigs & Twigs

Welcome to my weekly series!

Feel free to send me questions you'd like to have me answer and I will do my best to address the ones of most general interest.

EMAIL OR MAIL YOUR QUESTIONS TO: info@sprigsandtwigs.net or Linda Lillie, Sprigs & Twigs Inc, PO Box 245, Gales Ferry, CT 06335

Sprigs & Twigs Voted the Best by Day Readers Every Year!

Give us a call if we can be of service!

QUESTION THIS WEEK:

I have a small quince that seems not to be blooming at all. I think it is still alive. I have it in full sun, but there are no leaves or anything. What can I do to help it move along? Thank you - Lisa

Linda's Answer:

Hi Lisa,

Thank you for your question about a very interesting, fruit-bearing shrub that has fruit similar to pears. Quince shrubs go back centuries and were a common sight in colonial gardens in New England in the 1700's. They are relatively easy to care for and produce a fruit that can be picked in late October or November and brought indoors to ripen further for a few more weeks. The fruit can be made into jam and marmalade and used in cooking and baking.

Quince Flowers in the Spring

In the case of your shrub, if it had no leaves in the beginning of October when you sent me your question, I think it might be dead.

Quince usually does not lose its leaves until the end of October or later. Scratch the outside of the stem with your fingernail. If it is green under the scratched area, it is still alive. If it is brown, it is dead.

Quince blooms once a year, usually in April and May. Sometimes it blooms in the fall, if all the conditions are right, but when that happens, it will not bloom again the following spring.

You should feed your quince shrub in early spring with an organic, slow release fertilizer such as Flowertone™ by Epsoma.

Quince loves to be in full sun, so yours is in a good spot. Make sure it is not in wet or moist soil - Quince prefer soil that is medium to dry.

Linda K. Lillie has been President of Sprigs & Twigs, Inc. for the last 22 years. She is a graduate of Connecticut College in Botany, an accredited NOFA Organic Land Care Professional, a Connecticut Master Gardener and a national award winning landscape designer for her design and installation projects.
